

CS 331 (Software Engineering Lab)

Assignment 6 (Total Marks = 20)

A software product's user interface (UI) portion is responsible for all interactions with the user.

- I. Choose an appropriate UI (e.g., command language-based interface, menu-based interface, direct manipulation interface, etc.) for your software engineering project and justify your choice.

[Marks = 10]

- II. Implement the UI code components and show the user interactions with your software.

[Marks = 10]
