

CS 331 (Software Engineering Lab)

Assignment 9 (Total Marks = 20)

Q1. a) Prepare a *Test Plan* for your project. The *plan* should include:

- Objective of testing
- Scope (modules/features to be tested)
- Types of testing to be performed (e.g., unit, integration, system)
- Tools (if any)
- Entry and Exit criteria

b) Design at least 8 *test cases* for any one major module of your project.

Each *test case* should include:

- Test Case ID
- Test Scenario / Description
- Input Data
- Expected Output
- Actual Output
- Status (Pass/Fail)

[Marks = 5+5]

Q2. a) Execute the *test cases* designed above and document the *results with evidence* (screenshots/logs).

b) Identify and analyze at least 3 *defects (bugs)* found during testing. For each *defect*, provide:

- Bug ID
- Description of the issue
- Steps to reproduce
- Expected vs Actual Result
- Severity level (Low/Medium/High)
- Suggested fix

[Marks = 5+5]
